SOFTWARE ENGINEER | FULL STACK & AI APPLICATION DEVELOPER | AI INTEGRATED PRODUCTS

Full Stack Software Engineer with a proven track record of building scalable, production-grade applications across front-end and back-end systems. Proficient in React.js, Node.js, and Python, with strong expertise in designing and implementing RESTful APIs, data processing, and performance optimization. Experienced in owning end-to-end feature development, translating complex business requirements into technical solutions, and delivering high-quality software in fast-paced Agile environments.

EDUCATION

Bachelor of Science, Computer Science | Montana State University, Montana-USA, May 2023

SKILLS AND TECHNOLOGY

- **Programming Languages:** Python, JavaScript, TypeScript, SQL
- **Frontend:** React.js, Next.js, HTML5, CSS3
- **Backend & Frameworks:** Node.js, Django, Flask, RESTful API Development, API Integration, FastAPI
- **Databases:** MySQL, PostgreSQL, SQLite, SQLAlchemy, Relational Database Design, Database Administration
- **Cloud & DevOps:** AWS (Lambda, API Gateway, EC2, S3), Docker, Nginx, PM2, VPS Deployment (CLI)
- **Artificial Intelligence & Data Science:** Large Language Models (LLMs), Generative AI, AI Agents, Agentic AI, AI Workflows, Prompt Engineering, OpenAI API, LangChain, Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), Tesseract OCR, OpenAI Whisper, Pandas, Matplotlib, Plotly
- **Tools & Methodologies:** Git, GitHub, AWS CodeCommit, SVN, Jira, Agile, Scrum, SDLC, Unit Testing, Test-Driven Development (TDD), Performance Optimization, Secure Coding Practices
- **UI/UX:** Figma (Basic), Adobe XD, Wireframing, Prototyping, Mockups, User Flow Design
- **Professional Skills:** Communication, Team Collaboration, Problem Solving, Project Management, Adaptability, Independent Work

RELEVANT EXPERIENCE

Junior Software Engineer, Xilligence

07/2024 – 06/2026

- Designed and developed end-to-end full-stack features using React.js, Node.js, and Python, delivering scalable, production-grade applications.
- Owned the development of RESTful APIs, including requirement analysis, API design, implementation, and front-end integration.
- Designed and implemented relational databases, including schema design, relationships, and optimized SQL queries for efficient data handling.
- Built serverless backend services using AWS (Lambda, API Gateway, S3), enabling scalable APIs, file handling, and efficient data workflows.
- Integrated enterprise authentication using Active Directory, ensuring secure and seamless user access.
- Developed responsive and high-performance user interfaces using React.js.
- Built and integrated AI-powered features, including natural language to SQL data querying, document data extraction, voice-to-text input handling, and AI-based image processing workflows.
- Designed AI-driven systems to process unstructured inputs (text, voice, images) and convert them into structured, actionable outputs within application workflows.
- Optimized a large-scale data processing workflow (93,000+ records), reducing execution time from 4 hours to under 2 minutes.
- Conducted debugging and root cause analysis, improving system stability and reliability.
- Delivered features in Agile development cycles, ensuring consistent and timely releases.
- Deployed and managed production applications on client servers using Nginx and PM2, configuring reverse proxy, process management, and zero-downtime restarts for scalable and reliable frontend and backend services.

Full Stack Developer, Softworld Technologies LLC

10/2023 – 06/2024

- Built backend services using Java and Spring Boot, implementing core application logic.
- Developed small-scale applications to understand backend architecture and API design principles.
- Strengthened fundamentals in object-oriented programming and system design.

Backend Developer Intern, eGyanam Technologies Private Limited

08/2023 – 10/2023

- Developed RESTful APIs using Django REST Framework to enable efficient client-server communication.
- Built and deployed two full-stack web applications from scratch, handling backend logic and database integration.
- Deployed applications on AWS EC2, ensuring availability and basic scalability.

RELEVANT PROJECTS

Portfolio, [Portfolio](#)

- Developed a dynamic portfolio web application using Django templates, focusing on interactive UI/UX.
- Implemented features like horizontal scrolling, hover effects, and category filtering for enhanced user experience.
- Structured templates in a modular and maintainable way, enabling easy updates and scalability.

Web Development RealEstate Website, [HomeZen](#)

- Designed and implemented RESTful APIs and relational database schema for managing users, listings, and transactions.
- Built a responsive and dynamic UI for both user and admin workflows.
- Deployed the application on a VPS, handling server setup, configuration, and application hosting via CLI.
- Configured Nginx as a reverse proxy and used PM2 for process management, enabling reliable backend services, efficient request routing, and zero-downtime restarts.
- Owning end-to-end development, including architecture, scalability, and maintainability.
